

Terrain Fabrication Service

Issue 6

2016

P1

For over 40 years the Terrain Fabrication Service has been at the forefront of providing drainage solutions. From unique one-off fittings to complete fabricated drainage stacks, we have the expertise to overcome the challenges found within construction sites in the UK.

Within this technical bulletin we will look at some of the benefits and unique fittings which are available exclusively through the Terrain Fabrication Service.

Terrain fabricated drainage stacks

By working with your design team we can take your plans and provide you with a drainage solution tailor made for your building.

Because we understand the constraints of site storage we will work with your build schedule to ensure that the fabricated solutions are delivered when required. With the additional ability to pre-air test the stacks prior to delivery, the system can be installed more efficiently by reducing both installation and testing times.

Unique fitting - Terrain FUZE HDPE low level waste manifold

Due to the growing demand for space saving and low level connections, we have developed the low level waste manifold specifically for use with the Terrain Fabrication Service.

Available in 110mm and 160mm, the low level waste manifold is the ideal solution for overcoming the technical difficulties of bringing in up to 6 x 56mm connections at low level into the drainage stack.

With side entries it is ideally suited for installation at slab level and can be fabricated with a close coupled WC connection. Fitting can be fabricated with long spigots or ring seal connections for easy connection onto MuPVC or HDPE waste systems.

Key Benefits

SIMPLE ON-SITE CONNECTIONS

Straightforward installation saves on labour costs

REDUCES ON-SITE LABOUR COSTS

Reduced installation time keeps overall project costs down

REDUCES ON-SITE INSTALLATION TIME

Installation is simple and quicker than assembling loose fittings

REDUCES ON-SITE WASTE

Made to measure engineered solutions means there is a reduction in wasted materials

PRE-AIR TESTING AVAILABLE

Removes the time and skills required for on-site testing

WIDEST PORTFOLIO OF BESPOKE SOLUTIONS

Providing customised solutions for tricky one-off projects

40
YEARS

TERRAIN HAS OVER 40 YEARS EXPERIENCE OF FABRICATING

You can expect quality from a brand you can trust

BES 6001 ACCREDITATION

Our materials have all been responsibly sourced with full traceability throughout the supply chain

The Terrain fabrication brochure has recently been produced to explain the challenges faced within the construction industry and how our solution can help.

Take a look at our case studies to see our previous successes.
